

## Statement:

Due to the results, the fitness for use for the contract use is to be rated as follows:

Technical safety requirements (legal requirements):
X passed
failed

Fitness for use:
X very good
good
satisfactory
poor
very poor

## Furniture Testing Laboratory

TÜV Rheinland (Guangdong) Ltd.

## Objections:

None

## Recommendation:

None

## Remarks:

1. Only the following tests were performed per client's requirements.

Mechanical tests:

- Feature
- Workmanship and construction
- Performance test (below items only)
- Functionality
- Ease of assembly (not applicable)

Chemical tests:

- Tin Organic Compounds (all plastic)
- Toxic element (accessible parts)
- Resistance to corrosion (metal components)

The test report consists of 6 pages.
The tests were carried out in indoor ambient conditions at a temperature between $15{ }^{\circ} \mathrm{C}-25^{\circ} \mathrm{C}$ and following test severity 2 for general hotel, cafe, restaurant, etc. use.

Note: The test results exclusively base on the presented samples.
Detailed information regarding measurement uncertainty is available in the test lab and could be shown on customer request.

Guangzhou, China, 23/07/2010 (dd/mm/yyyy)

## Furniture Testing Laboratory

Test Report 143 confidential

1. Test on fitness for use

Assessment: very good
2. Test according to the Equipment and Product Safety Act (GPSG)
2.1 Test following EN 15372: 2008; General Safety Requirements (Feature / Workmanship and Construction)

Requirements: passed
2.2 Static and dynamic strength, requirements acc. to EN 15372: 2008; Test procedure following EN 1730: 2000
Requirements: not commissioned
2.3 Test according to EN 15372: 2008. Test procedure following EN 1730: 2000;

Stability (table)
Requirements: not commissioned

### 2.4 Identification of the manufacturer

Name and address of an authorized person (manufacturer or importer) based in the European Economic Area (EEA) must be affixed to products or its packaging, which are intended to be sold in the single European Union market.
Requirements: passed
2.5 Identification of the product

The product must be marked in such a way that it is possible to identify it clearly (e.g. by art No, batch No, production time etc.). The article is not marked sufficiently.
Requirements: passed
3. Test of the concentration of harmful substances (partial tests)

Requirements: passed

| "Chemical tests | Material | Legal requirement | confidential <br> requirement | Result | Unit | Verdict |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Tin Organic Compounds | M01 / M02 + M03 | TBT / TPT / DBT / DOT: < 0.1\% |  | not detectable | \% | passed |
| Resistance to corrosion (ISO 9227) | M04 | - | Corrosion is permitted along the edges and crevices | no corrosion occurred | $\mathrm{mg} / \mathrm{kg}$ | passed |
| Toxic element (EN 71-3) | M01 / M02 / M03 / M05 | - | $\begin{gathered} \mathrm{Sb}-60, \mathrm{As}-25, \mathrm{Ba} \\ -1000, \mathrm{Cd}-75, \mathrm{Cr}- \\ 60, \mathrm{~Pb}-90, \mathrm{Hg}- \\ 60, \mathrm{Se}-500 \end{gathered}$ | $\begin{gathered} \text { all: not } \\ \text { detectable } \end{gathered}$ | $\mathrm{mg} / \mathrm{kg}$ | passed |
|  | M04 |  |  | $\mathrm{Ba}: 209$ $\mathrm{mg} / \mathrm{kg}$ all other: not detectable |  |  |

4. Corrosion resistance

Requirements: passed
All visible parts are surface treated.
5. Colour fastness

Requirements: not applicable
6.1 Information for use following EN 15372: 2008

Requirements: passed
6.2 Assembly instruction following DIN EN 1727, cl. 7 and LGA-directive 33064.01

Requirements: not applicable
7. Test according to the textile marking law

Requirements: not applicable
Note to the law on textile marking (TKG):
According to the law on textile marking, the textile shall be marked with the proportional weight quantity of the raw materials used. The marking shall be given directly on the article itself or on the sales packaging for the end consumer. Within the scope of the performed test, no determination of the material was carried out with regard to this.
